SUMMARY

A passionate, detail-oriented Web Developer with relentless curiosity and an affinity for elegant solutions. Background in medical speech-language pathology gears me towards methodical problem-solving and empathy.
Teacher, leader, and life-long learner.

DEVELOPER EXPERIENCE

General Assembly's Web Development Immersive is a full-time, 12-week program in Boston. 600+ hours of in-class learning and self-motivated study to hone skills in full-stack web development, including front end frameworks, back-end development, and API interaction. View my portfolio.

The Wind Rises: Travel Itinerary Planning
- Capstone full-stack SPA built with React and Ruby on Rails
- Implemented DarkSky and multiple Google APIs
- Utilized third-party libraries for data visualization and Material-UI for styling

Anything but Trivial: Trivia Night Question Database
- Group project leveraging SCRUM methodology and team version-control
- Full-stack JavaScript application using Node.js Express server & API
- Utilized MongoDB & Mongoose to create nested documents within a non-relational database

Task: To-Do Manager
- Full-stack SPA with Ruby on Rails server API and JS with jQuery on front-end
- Constructed PostgresSQL database with multi-table relationships
- Leveraged mobile first design pattern with dynamic render using Bootstrap

ADDITIONAL EXPERIENCE

Acute Care Speech Language Pathologist (SLP
Boston Medical Center (BMC) (2017 – present, per-diem)
- Managed full time clinic and inpatient caseload
- Collaborated with multidisciplinary team of medical professionals
- Spearheaded department transition to 7-day/week coverage
- Mentor for advanced diagnostic techniques (endoscopy)

Brigham & Women's Hospital (2017-2018)
Per-diem SLP clinician before accepting full-time position at BMC

Indoor Cycle Instructor
Boston Sports Clubs (current)
- Lead a high-intensity, performance-driven studio class
- Curate dynamic set lists to drive class energy
